

Bleacher Report's Top 25 College Football Towns for 2014

State College is in Centre County, which is fitting since the community is smack dab in the middle of Pennsylvania. Equal parts far from Philadelphia to the east and Pittsburgh to the west, State College is in its own little world, and that world is Penn State.

Unlike most college towns that have seen a school within their borders grow into what it is today, State College exists almost solely as a locale for the school. PSU was founded in the 1850s, and the town was incorporated after that, growing almost parallel with the college's expansion.

Because of this symbiotic relationship, it's no surprise the athletic teams are adored by the community. Football, more than anything else, reigns supreme, and on game days it's not just PSU that's abuzz with football—it's the entire populace.
