

These Are the Top 10 Best Counties in Pennsylvania

3. Centre County

Source: Flickr user Clint Mickel

If you want a county that has great numbers all the way across the board, Centre County is pretty fantastic in that regard.

To start, this county had the fourth lowest unemployment rate with only 5.95 percent of the population being jobless. To add to that, only 6.54 percent of

families were below the poverty line, so living here means less stress in more ways than one.

The numbers don't stop there. This county had the second best high school graduation rate, and even the seventh best commute time, at merely 20 minutes on average. So this county is great for students and the working Joe alike.

Of course, there's more to this county than stats. Home to State College, [Bellefonte](#), and Ferguson Township, there are many townships and areas to peruse in your roamings.

And in case you're a foodie on the hunt for good eats, you can easily turn to Faccia Luna Pizzeria, Herwig's Austrian Bistro, or The Governors' Pub.
